## DETAILED ACTION

## Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

. The species of safener in claim 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 7-11 recite safener species.

The following claim(s) are generic: 1-6 and 12-21.

Application/Control Number: 10/578,735

Art Unit: 1616

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: WO 02/067682 (IDS filed on 5/10/06) discloses emulsion herbicidal compositions with safener quinoline derivatives namely in claims 1 and 2:

2. A composition according to claim 1, which comprises an amount, effective for antagonism of the herbicide, of 2-(5-chloroquinolin-8-yloxy)-1-methylnexyl ester, its free acid or a salt thereof of formula.

wherein M is a mono-, blo or thi-valent metal, ammonium, N(R)<sub>4</sub> or HN(R)<sub>5</sub>, wherein the substituents R are identical to or different from one another and are  $C_1$ - $C_{44}$ Byl or  $C_{7}$ - $C_{8}$ -hydroxyalsyl, or M is  $S(R_3)_9$  or  $P(R_3)_4$ , wherein the substituents  $R_1$  are identical to or different from one another and are  $C_1$ - $C_{46}$ Bi(N),  $C_2$ - $C_{36}$ Bi(Ny),  $C_3$ - $C_{36}$ Bi(Ny),  $C_4$ - $C_4$ Bi(Ny),  $C_4$ Bi(

Since the prior art discloses the same quinoline derivatives as instantly claimed in herbicide emulsions, then the special technical feature appears to be taught in the art and therefore Unity of Invention does not exist and restriction of the species is deemed proper.

A telephone call was made to Thomas Hamilton on 1/31/10 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Application/Control Number: 10/578,735

Art Unit: 1616

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERNST V. ARNOLD whose telephone number is (571)272-8509. The examiner can normally be reached on M-F 7:15-4:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
